WE PLANT THE FUTURE

WHO we are

SUZANO'S HIGHLIGHTS

Nice to meet you, we are Suzano

As producers of market pulp, we are pioneers in the innovation and production of renewable, bio-based materials from eucalyptus trees for consumer and industrial use.

Guided by our purpose of **renewing life inspired by trees**, we believe urgent action is needed to secure a sustainable future for the planet and its people. And this starts by stimulating a **bio-based economy**.

99 years
of life

3 mills
under construction

1.2 mi
eucalyptus seedlings
planted every day

5 offices

1.4 mi
hectares of eucalyptus farms
(**2.2 times Shanghai city**)

5 ports

7 technology centers

1 mi
hectares of conservation areas
(**9 times Hong Kong city**)

Supply over
100 countries

39,000
company employees
and contractors

10.9 mi
tons of market pulp
installed capacity per year

RMB 53 bi
net revenue in 2021

1.4 mi
tons of paper installed
capacity per year

11 mills
+ Veracel
(joint operation with Stora Enso)

INNOVATION +
SUSTAINABILITY
= INNOVABILITY

Innovability, or the pursuit of sustainable solutions through innovation, is at the core of all our work. This philosophy seeks to harmonize operational and environmental gains in production processes and leads us to develop bio-based materials from eucalyptus trees.

OUR PRODUCTS

Suzano's responsibly grown materials provide over **2 billion** people in more than **100 countries** with products made from sustainable and renewable resources. Our eucalyptus are carefully planted and harvested and the wood used by Suzano is certified.

IMAGINE a FUTURE OF

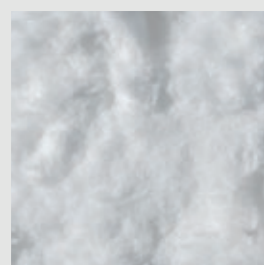

BIO-POSSIBILITIES

LEARN MORE ABOUT WHAT WE DO

Pulp

Pulp is mainly composed of wood fibers, which give plants rigidity and strength. The interweaving of these fibers is where several of our products come from. Our pulp is a raw material from renewable and sustainable sources applied in various products, such as paper and packaging.

Fluff

Eucafluff®, the world's first eucalyptus fluff, is an innovative and sustainable raw material designed for disposable sanitary absorbent products and other personal hygiene items.

Paper and board

We develop and produce special papers for different uses, such as packaging, bags, straws and paper cups, among others. We also have paper for printing, writing and books.

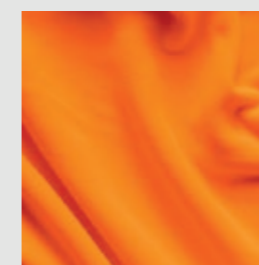

Hygiene

Our product line meets hygiene, cleaning, and family and home care needs, such as toilet paper, paper towels, paper napkins, diapers and wet wipes.

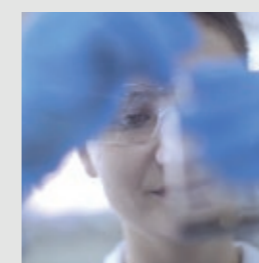

Lignin

Besides cellulose, lignin constitutes most of the wood of the trees. It is a renewable alternative for replacing fossil substances in products such as rubbers, paints and makeup.

Microfibrillated cellulose (MFC)

MFC is a renewable solution that can replace fossil substance and be used for various applications such as cosmetics (shampoo, conditioner, moisturizer and sunscreen) and sustainable fabrics.

Bio-oil

Bio-oil, a product made from eucalyptus biomass, is an alternative to partially replace fossil products, such as fuels and chemical compounds, contributing to the reduction of carbon emissions.

Bio-composites

We research the development, application and production scalability of bio-composites, that can be used in various industries such as automotive, packaging and consumer goods.

COMMITMENTS TO RENEWING LIFE

As leaders of our industry, we believe that we have a responsibility to renew the way we produce, consume, share value and work side by side with the planet.

We have established our **Commitments to Renewing Life**, 15 Long-Term Goals aligned with the United Nation's Sustainable Development Goals, that improve efficiency, reduce our environmental impact, minimize inequality, contribute to the regenerative economy and develop new solutions to challenges across all levels of the value chain and society.

by **2025**
we will

Combat the climate crisis

Remove over 40 million tons of carbon from the atmosphere.

Foster diversity equity and inclusion

Ensure that our leadership consists of at least 30% female and 30% black employees.

Learn more about our Commitments to Renewing Life here.

by **2030**
we will

Reduce poverty

Lift 200,000 people out of poverty in our areas of operation.

Offer more renewable products

Produce 10 million tons of products from renewable sources that replace plastic and other petroleum-based products.

Conserve biodiversity

Connect 500,000 hectares of fragmented forests of the Cerrado, Atlantic Forest and Amazon biomes.
